

## COMPACT DIFFERENTIAL

with **strong case, silent gear**  
create **powerful 2 WD tricycle**

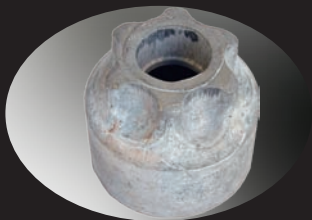

### HELICAL BEVEL GEAR

CNC process Helical bevel gear  
close link together with axle  
strong, durable, smooth and quiet.

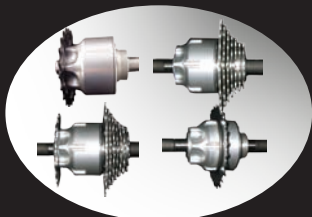

### SPLINE AXLE

Customise axle for different bikes  
Spline axle close link with DG72  
durable and stable transit power to  
the wheels

### FORGE BODY

AL6061 material  
one piece forge forming  
CNC process  
Anodize finish  
solid and strong body

### MULTI-PURPOSE COMPONENT

DG72N Multi-purpose design available for  
5~8 speeds free wheel  
single speed free wheel  
sprocket/central sprocket available  
disk brake rotor as parking brake  
suitable for different design tricycle,  
electric and electric-assist tricycles

### DG72N/DG72NJT

is a compact, rigid,  
multi-purpose component--  
especially designed for  
regular, electric and  
electric-assist tricycles-  
that efficiently transfer  
the rider's power to the wheels,  
creating a truly three wheeled  
vehicle as opposed to a bicycle  
with training wheels

### DG72N/DG72NJT

delivers your power into  
the tricycle's wheels, allowing  
you to bring both wheels into full play  
and make different rotation rate  
while turning.  
thus making it easier to turn.  
For a truly safe and comfortable  
tricycle ride, you should definitely  
install this differential gear
